-!- FUNCTION: This enzyme is an endonuclease that degrades
RNA-DNA hybrids specifically.

-!- CATALYTIC ACTIVITY: Endonucleolytic cleavage to 5'-
                                                                                                                                                                                                                                                                                                                  Proc.
